Attached is an updated draft of Section 2 Definitions. We should probably try to finish this up at the May 14th workshop. We stopped at Recreational Facility.

I have incorporated the revisions that we discussed in past workshops. Where the change was straight forward I simply made the change. When we didn't finalize the language or I had questions I've shown those in underline/strike out format. We should review those.

I've continued to highlight the terms that relate to timber harvesting so we can go back and review them once Mike Morse completes his proposed language.

Starting with Recreational Facility, I've gone through and tried to address some of the comments and suggested deleting some terms that are not used in the current ordinance or are redundant. Suggested changes are shown in underline/strike out format. I have left the comments in so you can see them as you review the remaining definitions. There are a couple of areas such as short term rentals and storage/warehousing that the discussion needs to go beyond the definition as to how we deal with them.

We should also discuss how the Town wants to deal with medical marijuana caregiver retail shops. The revised state law provides for them but includes an opt-in provision.
